Allergen Policy

Rydges Tradewinds Cairns is a Gold License HACCP Accredited Business. We follow HACCP control procedures in the purchasing, processing and service of all food products.

All menu items prepared by our chefs follow preset methods and are prepared in accordance with HACCP guidelines, which is a superior risk management programme for ensuring food safety. Food contents are known for natural fresh products, however we advise our clients that we could be unaware of some ingredients in the food prepared by us that is supplied but not declared in the product statements from secondary suppliers. Olive oil is used in the cooking process of our grills.

Rydges Tradewinds Cairns will advise upon request ingredients to clients with allergies, however we accept no responsibility whatsoever for any inadvertent use of supplied undeclared products.

As we are HACCP accredited you will be asked to complete and sign documentation on receipt of your catering.

Introduction to HACCP

HACCP Australia is a leading project management company which designs, implements and manages food safety programmes (FSP's) for organizations in the food and food related industries. HACCP Australia Food Safety Accreditation provides a recognised endorsement of food safety excellence. This endorsement offers assurance to the industry a product's suitability for use within a HACCP-based food safety programme.

HACCP is an internationally recognised method of identifying and managing risk and, when central to an active food safety programme, can provide vendors, the public and government sector bodies with a high degree of comfort that food safety is being taken seriously and is well managed. The concept is not new however. Researchers and suppliers to the NASA space programme developed the system to avoid the potentially disastrous consequences of failure above the earth's atmosphere. Today, many of the world's best manufacturers and vendors use the system as a basis for their quality management programmes.
